NEW!

One Streamlined Solution for Exosome Isolation - Under 30 Minutes

Simplifying Exosome Research

Norgen Biotek has streamlined its exosome isolation portfolio into a single, optimized kit designed to support a wide range of sample types and downstream applications — while maintaining the performance our customers trust.

SIMPLE AND EASY

Ready in 30 Minutes

Purified exosomes of use in functional studies prepared in under 30 minutes.

Single consolidated kit

Eliminates confusion and simplifies purchasing and inventory management.

Optimized, user-friendly workflow

Straightforward protocol with minimal hands-on time.

COMPATIBILITY

Compatible with multiple sample types - cost effective

Supports common exosome research samples, including:

- Plasma / serum
- Saliva
- Urine
- Cell culture media
- Other validated biofluids

BEST RESULTS

High-quality exosome recovery

Produces exosomes suitable for downstream:

- RNA & miRNA analysis
- Protein analysis
- qPCR, NGS, and other molecular assays
- Functional assays

Consistent and reproducible results

Designed for dependable performance across experiments and users.

One kit. Multiple sample types. Consistent performance.
