MiniSizer 50bp DNA Ladder (25bp - 650bp)

Catalogue Number: 11200 (100 gel lanes)

Description:

High quality ready-to-use double-stranded DNA ladder derived by recombinant technology for precise on-gel size and mass determination.

Features:

- Precise band sizes and masses for densitometric quantification.
- Fourteen discrete bands, ranging from 25bp to 650bp.
- Higher intensity band at 200bp and 400bp for easy reference.

Contents:

1mL of premixed DNA ladder (0.5 μ g/10 μ L) in loading buffer (10mM EDTA, 10% glycerol, 0.015% bromophenol blue, and 0.17% SDS).

Instructions:

Mix thoroughly. For best results, load 10 μ L of DNA ladder per well. For precise mass determination with a densitometer, stain gel after electrophoresis using 0.5 μ g/mL ethidium bromide for 30-40 minutes. The accompanying diagram shows the size and mass for each band based on 10 μ L ladder per well.

Storage:

Stable at room temperature. For longer term storage, -20°C is recommended.

This ladder was standardized using 10 μ L of DNA per lane on a 0.8 cm thick, 13 x 15 cm, 1.0% agarose gel run in TAE buffer.
