

## Shipping Accessories – 50 Mailers

Product #: 38300

## Product Insert

**Norgen's Shipping Accessories provides a comprehensive tool for shipping specimens collected using Norgen's different sample collection and preservation kits, as well as other collection kits.**

### INTENDED USE

Norgen's Shipping Accessories provides a safe and convenient tool for shipping non-infectious biological specimens. The SHIP TO envelops are used for shipping of both the accessories as well as the individual sample collection device to the donor/user. Each SHIP TO envelop is supplemented with: 1) a Biohazard Specimen Bag with absorbent pad; 2) a Bubble Envelop labeled as "Exempt Human Specimen"; 3) 2 blank labels; and 4) the Shipping Instructions. The Biohazard Specimen Bag is a sure-seal zipper bag to hold the collected specimen and protect against accidental spills. The bag contains an absorbent pad that can adsorb up to 4 mL of liquid and meets current labeling requirements of OSHA standard 29CFR1910.1030 regarding biohazard symbols. The Bubble Envelop is used as a RETURN envelop for the donor/user to ship the collected sample back to the lab for analysis. The user will first place the collected sample into the Biohazard Specimen Bag, and then place the Biohazard Specimen Bag into the Bubble Envelop. The Bubble Envelop protects against moisture and punctures, and facilitates smooth insertion with convenient self-sealing closure. Labels are provided to label both the outer SHIP TO envelop and the RETURN bubble envelop. The SHIP TO label will be filled out to contain the mailing information of the donor and the RETURN label will be filled out to contain the address to which the sample should be returned. Norgen's Shipping Accessories match the regulations of the International Air Transport Association (IATA).

### Shipping Accessories Contents:

Component	Contents
SHIP TO Envelops	50
RETURN Bubble Envelope	50
Mailing Labels	10 sheets
Product Insert	1

### RETURN Bubble Envelop Contents:

Component	Contents
